Rene and his book will provide your audience with new refreshing information.

But don't take our word for it! Read what the critics say:

“Occasionally, a self-help book is written which does not parrot its numerous predecessors: instead, it is truly unique in its discussion of unexplored material, FaithSkills fulfills the later description. Messier has made a remarkable discovery which enables the reader to not only change the way they look at themselves, but also to organize the surrounding world to their desired specifications”.
